

Parks snippets

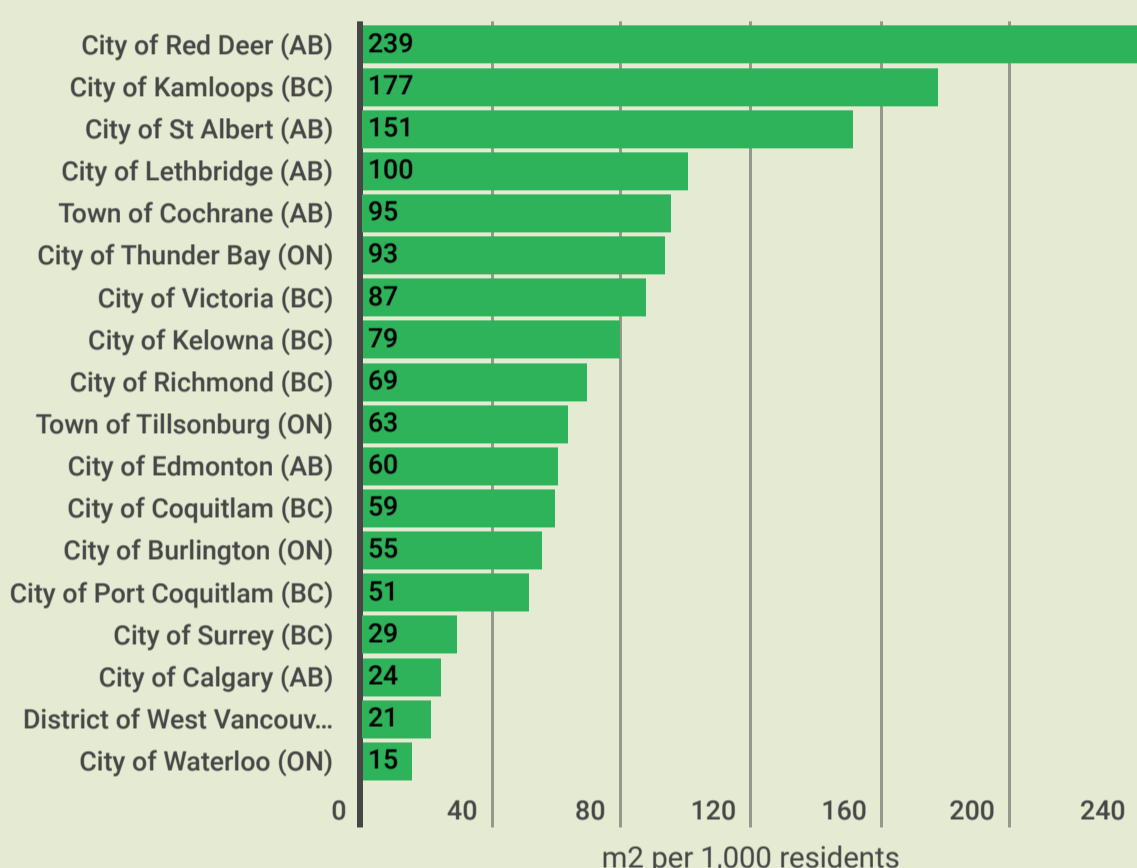

Yardstick is a suite of benchmarking tools that delivers need to know information for your business to inform your decision making and improve your service delivery. The information in this report comes from the 2019 Yardstick Parks Benchmarking project, and is compiled from data from the Canada specific section of the report. The 2020 project is currently underway and results should be ready for reporting by mid 2020.

Relocatable washrooms

The number of seasonal and relocatable washrooms provided for both seasonal and year round use varies significantly between Canadian organisations with the highest rate of provision being in Squamish. Median expenditure per facility in 2019 was \$2,677.

Community Gardens

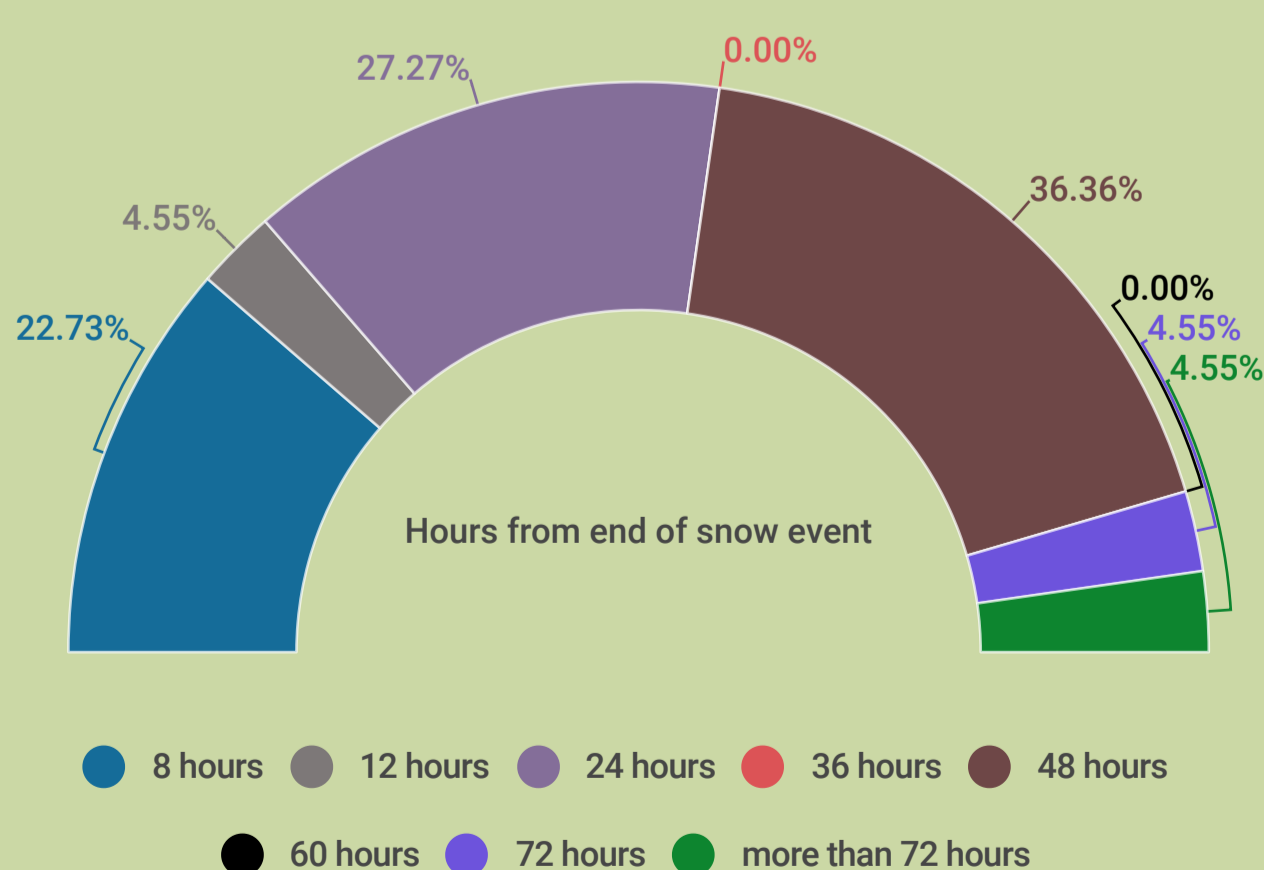

Median provision of community gardens is around 66 m2 per 1,000 residents. Most (63%) of community gardens are managed by community organisations, with a further 27% managed by local residents and 10% managed by municipalities. Just over half of organisations have an adopted policy on community gardens.

Cemeteries

Annual interments (casket burials and ash interments) per 1,000 residents ranged from 0.5 to 8.8 with a median of 1.9. In general, the number of ash interments was higher than casket burials with an average of 60% of burials being ash interments.

Snow Removal Level of Service

The most frequent level of service (36%) for removal of snow from hard surfaces in high priority areas is 48 hours from the end of the snow fall event. 24 hours and 8 hours have the next highest incidence at 27% and 23% respectively.

How well do you know your business, and how well are you providing for your communities? Is it enough? Can you demonstrate improvements? Do you know what your current level of service is and what it is costing you? How will future plans impact on expenditure? Let us help you measure, compare and improve your performance.
