

ACCESSIBILITY

We offer numerous solutions to support your efforts to create an inclusive and accessible facility for your patrons and community. Contact one of our sales staff to discuss what equipment is best suited for you.

Anchored Access Lifts

These lifts require an in-deck anchor or a permanent install with Hilti anchors. They have the highest weight lifting capacity of all accessibility lifts.

Aquatic Wheelchairs

These stainless-steel chairs are designed for use in public pools.

Portable Access Lifts

These lifts are portable, so they can be moved out of the way for other activities or events occurring at your pool. They have a counter weight stack and a lower lifting capacity than anchored lifts.

Pool Access Steps

You can add stairs where temporary extra access is required. These are custom made to fit your pools gutter profile and water depth. They can be removed from the pool and put back in place as required.

Therapy Ladders

These ladders have added consideration to those needing assistance while entering or exiting the pool. These offer accessibility at a lower cost than a larger portable pool access step/stair system.

Teaching Platforms

Use these underwater platforms to create a shallow water teaching space in deeper water. Great for tot lessons.
