

Cozy Robinia Playhuts

NEW PART OF NATURE PLAY

The design of new Robinia Playhuts is a little smaller than traditional playhouses and always has a minimum of one open side. This gives younger children a feeling of security and a familiar sense of house and space, while playing. Robinia Playhuts welcome children of all abilities.

The complete ground-level access inside and around allows for wheelchairs and walkers to access. Caregivers and adults can also interact with the children through the open design, providing an extra sense of security.

A COZY PLAY SPACE > FOR THE YOUNGEST

The playhut design resembles that of a traditional playhouse.

100% Robinia wood.

< DEVELOPS COGNITIVE AND CREATIVE SKILLS

The feature of the counter encourages dramatic play explorations as the children play and practice their language and social skills.
