Gunnebo Entrance Control Solutions for Recreation Centers

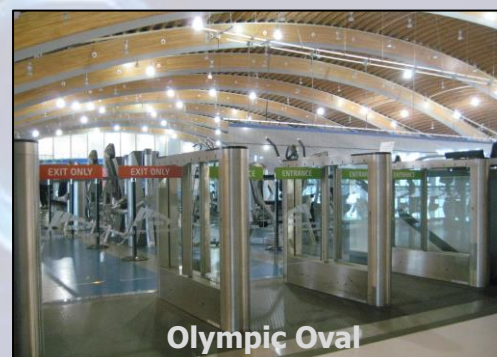

Whether you are looking to control access at the front counter before you enter the facility or limit access once inside, GEC - Gunnebo Entrance Control has a product that can fit your recreation center application.

- Enable paying members to enter the facility easily and prevent “tailgating” ensuring guests are checking in thus increasing revenues and eliminating liability issues.

Since the installation of our fitness tripod and pool gate we have increased our single drop-in admissions by \$26,000 over a 7 month period. Based on this data we anticipate the project recouping its costs in a 12 -14 month period.

Grant Brown- Manager of Administrative Services – Oak Bay

- Track membership use accurately by adding a “people counter” to your system or link the system to any access control software including *Class*.
- Reduce staffing requirements at the entry point, and take the stressful responsibility of confrontation away from front desk personnel.

With Several different models to choose from you are sure to find the right look, level of security and price point in our product line.

- CSA approved.
- Multiple safety features.
- Changeable functionality.
- 2yr warranty with service offices nation-wide.
- Quality tested for exceptional operating reliability.

Choose from the basic version or customize to fit your environment with our extensive range of aesthetic and functional options

Some of our B.C. Rec Center Partners include:

- Minoru Recreation Center- Richmond
- Surrey Games Prep Center
- Olympic Oval - Richmond
- Oak Bay Rec Center
- Esquimalt Rec Center
- Cloverdale Rec Center
- Panorama Rec Center
- North Surrey Rec Center

Some Other Canadian Partners...

- University of Toronto Varsity
- Goldring Center for Excellence
- University of Mississauga
- Cardel Rec Center Calgary
- University of Calgary Olympic Oval
- Talisman Rec Center Calgary

Try this simple formula to see if you are losing valuable revenue.... 2-4% of users “sneak” in – multiply that by the average walk in rate =?
 $800000 \times 2\% = 16000 \times 4\$ = \$64,000$ lost revenue /yr.

Security Solutions for Recreation Facilities

Key Management

- **Despite the increasing sophistication of commercial security, the management of keys remains a weak link.**

At best they'll be issued from a security desk. At worst they'll be hung on a hook in open view or hidden somewhere at the back of a manager's desk drawer. If you lose them or they fall into the wrong hands, you risk losing access to buildings, facilities, secure areas, equipment, machinery, lockers, cabinets and vehicles. We can help you with key control and managing this important aspect of your security.

- **Key Control**

Standard locking systems without utility patent protected keys allow anyone who gains possession of a key to easily and inexpensively make a copy. With an unauthorized duplicate key, a thief has complete access to a building, its physical and intellectual property, and the people inside High Security locking systems ensure that the keys to a facility can only be duplicated by certified Medeco dealers and only with the proper authorization.

- **Traka 21 Key Cabinet**

Simple, efficient and cost-effective, Traka21 helps trace and account for every key or keyset, which is individually locked in place and removed with personal codes, ensuring that critical business operations are never jeopardised. No one has to go home with multiple facility keys again!

Door Hardware

- Laws and codes have changed for disabled persons washrooms – we can help you get up to code and compliant with all the latest regulations!
- Door closers adjusted and not leaking fluid. Making sure your doors close at the right speed and close properly saves you money and makes your facility more environmentally friendly!
