

BC Recreation & Parks Association Community Recreation Facilities Assessment Study

June 2006

About the BCRPA

The British Columbia Recreation and Parks Association is a not for profit organization dedicated to building and sustaining active healthy lifestyles and communities in BC. Established in 1958, the Association is a central resource agency for members and stakeholders of the parks, recreation, physical activity and culture industry, providing leadership, training and support to help meet national, provincial and local priorities. Through a diverse network of partners and extensive programs and services, BCRPA actively advocates accessibility and inclusiveness to recreation and physical activity and strives to help integrate sport and recreation opportunities.

Our Vision

The recreation, parks and culture sector is an essential partner for building healthy individuals and communities, as well as fostering economic and environmental sustainability.

Our Mission

BCRPA is committed to leading the parks, recreation and culture sector in building and sustaining healthy active communities, including fostering economic and environmental sustainability. We inspire and support community leaders and practitioners through advocacy, communication, education, resources and other services.

Acknowledgements

BCRPA would like to thank the members of the Steering Committee who volunteered their time and expertise to the development of this document. The Steering Committee members were:

- Suzanne Allard Strutt, CEO, British Columbia Recreation & Parks Association
- Nancy Burton, Hughes Condon Marler: Architects
- Don Chow, Director, British Columbia Recreation & Parks Association
- Darryl Condon, Principal, Hughes Condon Marler: Architects
- Sharon Meredith, Operations Manager, British Columbia Recreation & Parks Association
- Per Palm, Vancouver Parks Board
- Janet Whitehead, Corporation of the Township of Langley

The BCRPA would like to also acknowledge Hughes Condon Marler: Architects for their services and expertise in the creation of this Phase 3 - Community Centres, Youth Centres, Seniors Centres and Community Halls of the Community Recreation Facilities Assessment Study.

The compilation of this data required the cooperation of a large number of participants across the municipal recreation sector in British Columbia. BCRPA is thankful for the time and efforts provided by all participants.

Section 1

Executive Summary

This section of the report provides a summary of the key aspects of phase three of the facility inventory study process and database.

1.1 Background

The scope of the study was to produce an inventory, in the form of a database, of four types of indoor community recreation facilities owned and/or operated by local municipalities in British Columbia. This work is the third phase of a multi-phase project intended to provide accurate information on the state of community recreation facility infrastructure throughout the province.

1.2 Facility Life Cycle Stages

One of the key aspects of the inventory is to provide the framework for a more detailed assessment of general facility condition during subsequent phases of the study. One component of the database that assists in this regard is the life cycle classification. This type of categorization is helpful in building an understanding of the general state of our facilities. Typically, all facilities follow a similar pattern whereby operational costs and the need for significant capital upgrades increase dramatically as the facility ages. For this purpose, we have identified five facility life cycle stages according to their ages.

- Stage 1 Planning
- Stage 2 1 to 14 years old
- Stage 3 15 to 24 years old
- Stage 4 25 to 34 years old
- Stage 5 35 years and older

Facility life cycle stage assumptions are generalizations and the actual condition of each facility will vary. It is not the intent of this report to provide detailed facility assessment information as this issue is intended to be addressed during the next phases of the Community Recreation Facilities Assessment Study.

Section 1: **Executive Summary**

Section 2: Background

Section 3: Facility Life Cycle Stages

Section 4: Key Findings

Section 5: Summary

Appendices

Project Objectives:

- 1 To provide assistance to communities throughout British Columbia in evaluating the lifecycle stage of their facilities
- 2 To provide guidance and information to these communities related to the upgrading, maintenance or replacement of existing facilities
- 3 To ensure that British Columbians have access to the facilities they need in order to live healthy, active lifestyles.

1.3 Key Findings

In total, 185 surveys were distributed and an 88% response rate was achieved. From this data, a total of 433 facilities were identified and incorporated into the inventory. Following is a summary of each facility type:

Table 1.3a

| Facility Type | Total Number |
|-------------------|--------------|
| Community Centres | 177 |
| Youth Centres | 69 |
| Seniors Centres | 73 |
| Community Halls | 114 |
| Total | 433 |

Using the information contained in the database, the estimate of the total floor area of all facilities is over 950,000 m².

The total usage of all of facilities in the database is approximately 38,000,000 visits per year. This represents 10 facility visits for each resident of British Columbia per year.

The inventory contains data on facility age for 382 of the 433 facilities in the inventory. Based upon the facility life cycle stages outlined in section 1.2 above and the reported age of each facility, the breakdown of life cycle stage by facility type is summarized in the following table.

Table 1.3b

| Facility Type | Stage 1 | Stage 2 | Stage 3 | Stage 4 | Stage 5 |
|--------------------|---------|---------|----------|----------|-----------|
| | planned | 1 to 14 | 15 to 24 | 25 to 34 | 35 & over |
| Community Ctrs | 0 | 43 | 16 | 59 | 44 |
| Youth Centres | 1 | 36 | 8 | 4 | 15 |
| Seniors Centres | 0 | 14 | 12 | 17 | 17 |
| Community Halls | 1 | 14 | 12 | 16 | 56 |
| Total | 2 | 104 | 48 | 96 | 132 |
| Percentage | 0.5% | 27% | 12.5% | 25% | 35% |

This table indicates that a large majority of facilities (70%) are 25 years old or older and that by 2010 most of these facilities will have reached stage 5. This is very similar to the data for the indoor facility types in phase one of the inventory where 72% of facilities where 25 years old or older.

Further information, and greater detail, is contained in Section 4 of this report.

Section 2

Background

This section of the report provides background on the principles established by the project steering committee, a commentary on the benefits of recreation facilities, a discussion of the study process and methodology as well as the context of this report.

2.1 Terms of Reference

During the winter of 2005, The British Columbia Recreation and Parks Association (BCRPA) commissioned an inventory, in the form of a database, of four types of community recreation facilities owned and/or operated by local municipalities. This work is phase three of a multi-phase project intended to provide accurate information on the state of community recreation facility infrastructure throughout the province.

2.2 Project Objectives

The project objectives were as follows:

- To provide assistance to communities throughout British Columbia in evaluating the lifecycle stage of their facilities
- To provide guidance and information to these communities related to the upgrading, maintenance or replacement of existing facilities
- To ensure that British Columbians have access to the facilities they need in order to live healthy, active lifestyles.

Section 5: Summary

Appendices

2.3 Benefits of Recreation

Underlying the importance of this inventory is a firm belief in the wide ranging societal benefits provided by community recreation facilities and the corresponding need for stable and sustainable provision of these services. According to the Canadian Parks / Recreation Association, a brief summary of the benefits of recreation¹ is as follows:

- Recreation and active living are essential to personal health a key determinant of health status.
- Recreation is a key to balanced human development helping Canadians reach for their potential.
- Recreation and parks are essential to quality of life.
- Recreation reduces self-destructive and anti-social behavior.
- Recreation and Parks build strong families and healthy communities.
- Pay now or pay more later! Recreation reduces health care, social service, and police/justice costs.
- Recreation and parks are significant economic generators in your community.
- Parks, open spaces and natural areas are essential to ecological survival.

Accepting these key benefits, the importance of ensuring the long term sustainability of a healthy stock of community recreation facilities becomes clear.

¹ The Benefits Catalogue - Canadian Parks/Recreation Association, 1997

2.4 Current Context

Factors affecting the construction of new facilities as well as upgrading of existing facilities are many and widespread. However a few key industry trends are important to note. The following issues all have contributed to the current condition of British Columbia's stock of recreation facilities as well as to the challenges faced by the industry:

- Recreation programming has shifted from structured to nonstructured (i.e. user dictated). This impacts the size, layout and nature of spaces within the facilities
- The construction of stand alone dedicated facilities has reduced in favour of multi-purpose type facilities.
- The lack of consistent and widespread funding mechanisms for community recreation facilities.

2.5 Study Scope

This work summarized by this report provided an inventory of the following types of community recreation facilities:

- · Community Centres
- Youth Centres
- Seniors Centres
- Community Halls

Subsequent phases of this project are intended to study the physical condition of a cross section of all types of the indoor facilities in the inventory.

2.6 Study Process

The process utilized to compile this phase of the facility inventory involved a detailed single stage survey. The survey was distributed to all municipalities and Regional Districts in British Columbia. Data from the completed surveys was then added into the inventory database (compiled in MS Access format) created during phase one of this process. As in phase one and in addition to the database, facility locations were plotted on a drawing of the province, allowing for a variety of graphical representations of the data.

The survey methodology relied upon self-reporting by organization and accordingly the data was not verified by the consultant teams. In situations where organizations did not have or maintain the information requested the corresponding section of the database was left blank.

2.7 Life Cycle Assessment

One of the key aspects of the inventory is to provide the framework for a more detailed assessment of general facility condition during subsequent phases of the study. One component of the database that assists in this regard is the life cycle classification. For this purpose, we have classified facilities by age. A detailed description of this is provided in Section 3 of this report. It is important to note that the ongoing viability of a particular facility is influenced by a wide variety of factors in addition to its physical condition. Examples of these factors are changing demographics, accessibility, gender equity, sport technical standards, trends in recreation, operational costs, and programming considerations. These issues were outside of the scope of this phase of the project.

Section 3

Facility Life Cycle Stages

One of the Study goals was to categorize the inventoried facilities according to their position within a typical facility life cycle. This type of categorization is helpful in building an understanding of the general state of our facilities. Typically, all facilities follow a similar pattern whereby operational costs and the need for significant capital upgrades increase dramatically as the facility ages. For this purpose, we have identified five facility life cycle stages.

- Stage 1 Planning
- Stage 2 1 to 14 years old
- Stage 3 15 to 24 years old
- Stage 4 25 to 34 years old
- Stage 5 35 years and older

In order to facilitate the comparison of data between Provinces, it was decided to pattern the life cycle stages on the life cycle stages contained in a similar report² prepared for the Alberta Recreation and Parks Association in January 2001.

It is important to note that the facility stage assumptions are generalizations and the actual condition of each facility will vary. Factors affecting this will include the quality of original construction, climate, maintenance procedures and capital expenditures. Furthermore, it is not the intent of this report to provide detailed facility assessment information. This issue is intended to be addressed during subsequent phases of the Community Recreation Facilities Assessment Study.

Contents

Section 1: **Executive Summary**

Section 2: Background

Section 3: Facility Life Cycle Stages

Section 4: Key Findings

Section 5: Summary

Appendices

Following is an explanation of the five stages and the assumptions related to their operating condition.

Stage 1

During Stage 1, a facility is in the planning and /or construction phase. Once a facility has been opened to the public it is no longer in Stage 1. During this stage there are typically no maintenance or capital improvement funds required.

Stage 2

Stage 2 facilities are between one and fourteen years old. During this period, standard operating and maintenance budgets are typically adequate to operate the facility.

Stage 3

Stage 3 facilities are between fifteen and twenty-four years old. It is during this stage that standard operating and maintenance budgets may not be adequate to address the major refurbishment or replacement of building elements that have deteriorated. The ability of facility operators to fund these additional expenditures can have a significant impact on the future lifespan of the facility.

Stage 4

Stage 4 facilities are between twenty-five and thirty-four years old. During this stage, many of the facilities major components will require replacement. In addition to standard operating and maintenance budgets, significant capital improvements may be required to extend the life of the facility.

Stage 5

Stage 5 facilities are older than thirty-five years old. During this stage, facilities typically become more costly to operate and maintain. As well, large scale rehabilitation or replacement may be required in order to continue to serve the community.

As previously noted, it is important to understand that the facility life cycle stages are generalizations and that detailed facility assessments will be required to determine the actual condition of a specific facility. Furthermore, the condition of a facility as it ages will largely be dependent on the quality of maintenance and the ability of the operator to fund ongoing capital improvements.

Section 4

Key Findings

The results of the survey have been consolidated into a facility inventory database. Using this data, a variety of analyses are possible. This section of the report highlights some of the key findings of the survey.

4.1 Study Participants

In total, 185 surveys were distributed and an 88% response rate was achieved. A list of survey participants is contained in the Appendix.

The following table provides a summary of the types of organizations surveyed as well as the response rate.

Table 4.1

| Type of Organization | Surveys Issued | Surveys Complete | % Completed |
|----------------------|-------------------|---------------------|-------------|
| Municipality | 145 | 129 | 89% |
| Regional District | 36 | 28 | 78 |
| Other | 4 | 5 | 125% |
| Total | 185 | 162 | 88% |

Detailed data was gathered for facilities where the surveyed organizations own, operate or provide services to their communities through the use of some form of long term agreement. In some cases, surveys where returned by organizations other than those that were issued the survey and that is the reason for the 125% reporting rate in the "Other" category.

4.2 Facility Type Summary

The following table summarizes the total number of facilities of each of the four facility types included in the survey.

Table 4.2a

| Facility Type | Total Number |
|-------------------|--------------|
| Community Centres | 177 |
| Youth Centres | 69 |
| Seniors Centres | 73 |
| Community Halls | 114 |
| Total | 433 |

These totals include all facilities that are either municipally owned, operated as well as facilities that are not municipally owned where services are provided on the basis of a long term operating agreement. A summary of privately owned and operated facilities is contained in the following section.

The following summarizes the total number of each facility type.

Figure 4.2b

Community Halls
Seniors Centres

Youth Centres

Community
Centres

0 50 100 150 200

Number of Facilities

4.3 Private Facilities

In addition to the above listed facilities, survey participants were asked to identify any privately owned and operated facilities that serve their communities. Examples of these types of facilities include those owned and operated by academic institutions, private operators, non-profit groups and the military. The following table summarizes the total number or privately owned and operated facilities identified in the survey process.

Table 4.3a

| Facility Type | Total Number |
|-------------------|--------------|
| Community Centres | 78 |
| Youth Centres | 41 |
| Seniors Centres | 94 |
| Community Halls | 217 |
| Total | 430 |

No additional information was collected regarding these facilities and data regarding their usage is not included in the database.

The following figure indicates the total number of public and private facilities in terms of total facilities and by facility type.

Figure 4.3b

4.4 Facility Locations

One of the important opportunities provided by the database is the ability to facilitate detailed analysis of the geographical distribution of facilities. This has significant ramifications as it could demonstrate areas of the province where community members are significantly under or over served.

Following are a series of figures that provide a sample of the type of geographic analysis that is possible from the data. The four figures chart location of each type of facility.

Figure 4.4a Community Centre Facilities by Location

Figure 4.4b Youth Centre Facilities by Location

Figure 4.4c Seniors Centre Facilities by Location

Figure 4.4d Community Hall Facilities by Location

4.5 Facility Ownership

Survey participants were asked to identify the ownership of each facility. Data was received for 410 facilities. The following table summarizes the ownership structure for facilities contained in the inventory.

Table 4.5

| Facility Type | Municipal | Regional District | YMCA / | Other non-profit | Private Sector | Other |
|-----------------|-----------|----------------------|--------|---------------------|-------------------|-------|
| Community Ctrs | 119 | 23 | - | - | - | 14 |
| Youth Centres | 57 | 2 | - | 3 | 1 | 6 |
| Seniors Centres | 58 | 3 | - | 7 | 2 | 2 |
| Community Halls | 91 | 10 | - | 6 | - | 6 |
| Total | 325 | 38 | - | 16 | 3 | 28 |
| Percentage | 79% | 9.5% | 0% | 4% | 0.5% | 7% |

4.6 Facility Operation

Survey participants were asked to identify the entity that operates each facility. Data was received for 430 facilities. The following table summarizes the operational structure for facilities contained in the inventory.

Table 4.6

| Facility Type | Municipal | Regional District | YMCA / | Other non-profit | Private Sector | Other |
|--------------------|-----------|----------------------|--------|---------------------|-------------------|-------|
| Community Ctrs | 128 | 16 | 2 | 13 | 2 | 15 |
| Youth Centres | 43 | 1 | 1 | 20 | - | 4 |
| Seniors Centres | 36 | 3 | - | 23 | 1 | 9 |
| Community Halls | 77 | 8 | - | 21 | - | 7 |
| Total | 284 | 28 | 3 | 77 | 3 | 35 |
| Percentage | 66% | 7% | 0.5% | 18% | 0.5% | 8% |

4.7 Facility Area Summary

The following table summarizes the approximate total floor area of each of the four facility types included in the survey. 337 of the 433 facilities contained in the database provided this data. The remaining 96 are not included in the values shown in this table.

Table 4.7

| Facility Type | Total Area (m²) | Average Area (m²) |
|-------------------|-----------------|-------------------|
| Community Centres | 596,485 | 4,200 |
| Youth Centres | 33,182 | 626 |
| Seniors Centres | 46,786 | 835 |
| Community Halls | 62,733 | 729 |
| Total | 739,186 | 1,707 |

Using the assumption that non reporting facilities are proportional in size, it is possible to extrapolate the approximate total area 3 of all facilities in the province which would be in the order of $950,000 \text{ m}^2$.

³ Assumes average area for each of the non-reporting facilities.

4.8 Facility Usage

Survey participants were asked to identity the total facility usage in terms of number of visits per year. The following table summarizes the approximate number of visits per year for each of the four facility types included in the survey. Of the 433 facilities identified in the database, 248 provided data on usage. In cases where facility usage data is not measured or available, usage values have not been included in the table's data.

Table 4.8 - Total Facility Usage - Visits Per Year

| Usage Type | Community Centres | Youth Centres | Seniors Centres | Community Halls |
|----------------------|----------------------|------------------|--------------------|--------------------|
| # reporting data | 128 | 42 | 34 | 44 |
| Programs / Lesson | 6,624,060 | 124,883 | 451,737 | 193,552 |
| Special Events | 1,369,879 | 123,670 | 65,258 | 707,061 |
| Rentals | 3,067,085 | 8,116 | 121,398 | 544,443 |
| Drop Ins | 6,298,431 | 438,295 | 473,472 | 37,675 |
| Other | 3,687,264 | 7,374 | 335,826 | 208,045 |
| Total | 21,046,719 | 702,338 | 1,447,691 | 1,690,776 |

The usage totals contained in the database combine for a total usage for reporting facilities of **24,887,524** visits per year. This represents **6.4** facility visits for each resident of British Columbia per year.

Assuming that the usage patterns in the non-reporting facilities is proportional to those that reported data, then it is possible to extrapolate the approximate total usage of all of facilities in the database as approximately **38,000,000** visits per year. This represents approximately **10** facility visits for each resident of British Columbia per year.

4.9 Life Cycle Stage

The following table summarizes the life cycle stages for 382 facilities that reported facility age for each of four facility types included in the survey.

Table 4.9a

| Facility Type | Stage 1 | Stage 2 | Stage 3 | Stage 4 | Stage 5 |
|----------------------|---------|---------|----------|----------|-----------|
| | planned | 1 to 14 | 15 to 24 | 25 to 34 | 35 & over |
| Community Centres | 0 | 40 | 16 | 59 | 44 |
| Youth Centres | 1 | 36 | 8 | 4 | 15 |
| Seniors Centres | 0 | 14 | 12 | 17 | 17 |
| Community Halls | 1 | 14 | 12 | 16 | 56 |
| Total | 2 | 104 | 48 | 96 | 132 |
| Percentage | 0.5% | 27% | 12.5% | 25% | 35% |

This table indicates that a large majority of facilities (70%) are 25 years old or older and that by 2010 most of these facilities will have reached stage 5.

It is important to note that the facility life cycle stage relates only to the age of the facility (refer to section 3). In many cases facilities have had ongoing upgrades and renovations. The nature of these ongoing upgrades may have a significant impact on the actual condition of a facility. Refer to section 4.13 for a summary of the significant facility upgrades identified within the database.

The following figure summarizes the total number of facilities in each stage.

Figure 4.9a

Although the actual condition of a facility is the result of many more factors than age, it is significant that such a large majority of facilities are over 25 years old. The average age of all of the facilities in the database is 34 years. For reference it is important to note that the stage 5 life cycle classification starts at 35 years. During Stage 5 facilities typically become more costly to operate and maintain and, as well, large scale rehabilitation or replacement may be required in order to continue to serve the community. Given the relatively fewer number of facilities built in the last 25 years, it appears reasonable to assume that a significantly higher rate of facility replacement will be required in the coming years in order that the sustainability of the current facility stock is maintained.

The issue requires further study during future phases of the Community Recreation Facilities Assessment Study.

4.10 Facility Type Stages

The following figure summarizes the life cycle stages for each of four facility types included in the survey. The figure displays the data in terms of numbers of facilities of each type in each stage. Refer to section 3.0 for additional information regarding the life cycle stages.

Figure 4.10

As shown in figure 4.10, the life cycle stage breakdown varies by facility type with the Youth Centres typically being the youngest and the Community Halls being the oldest.

4.11 Facility Upgrades

Facility owners and operators continue to invest in their facilities in order to protect their communities' investment and improve service. Survey participants were asked to identity the number of major renovations and upgrades that have been completed since the facility was opened. For the purposes of the inventory, a major renovation or upgrade was defined as having a cost of \$50,000 or greater.

Table 4.11a

| Facility Type | Completed Facility Upgrades | | |
|-------------------|-----------------------------|--|--|
| Community Centres | 215 | | |
| Youth Centres | 14 | | |
| Seniors Centres | 43 | | |
| Community Halls | 33 | | |
| Total | 305 | | |

In addition, survey participants were asked to identify planned major expansion, renovation or upgrading projects. The total number of planned facility upgrades is summarized below:

Table 4.11b

| Facility Type | Planned Facility Upgrades | |
|-------------------|---------------------------|--|
| Community Centres | 94 | |
| Youth Centres | 10 | |
| Seniors Centres | 17 | |
| Community Halls | 28 | |
| Total | 149 | |

4.12 Accessibility

In many cases, facilities present challenges for people with physical mobility, visual impairment and hearing impairment disabilities. Survey participants were asked to subjectively rate their facilities in terms of access for both users and spectators. The results of this are summarized in the following tables.

Table 4.12a – Accessibility for Users

| Facility Type | Poor | Good | Very Good |
|--------------------|------|------|-----------|
| Community Centres | 20 | 94 | 58 |
| Youth Centres | 17 | 26 | 22 |
| Seniors Centres | 3 | 38 | 29 |
| Community Halls | 26 | 46 | 36 |
| Total ⁴ | 66 | 204 | 165 |
| Percentage | 15% | 47% | 38% |

Table 4.12b - Accessibility for Spectators

| Facility Type | Poor | Good | Very Good |
|--------------------|------|------|-----------|
| Community Centres | 31 | 99 | 39 |
| Youth Centres | 22 | 26 | 14 |
| Seniors Centres | 10 | 33 | 24 |
| Community Halls | 30 | 44 | 14 |
| Total ⁵ | 93 | 202 | 91 |
| Percentage | 24% | 52% | 24% |

Although not the result of detailed facility analysis, this data indicates that there are a significant number of facilities that do not adequately provide access for community members that are physically challenged.

⁴ Facility totals vary from Table 4.3a due to some of the facilities not reporting date of completion.

⁵ Facility totals vary from Table 4.3a due to some of the facilities not reporting date of completion.

4.13 Community Demand

Survey participants were asked to comment on whether or not their current facilities meet community demand for each facility type. The results of this are summarized in the following table.

Table 4.13

| Facility Type | Facilities that meet demand | Facilities that do not meet demand | |
|-------------------|-----------------------------|------------------------------------|--|
| Community Centres | 112 | 53 | |
| Youth Centres | 37 | 27 | |
| Seniors Centres | 43 | 24 | |
| Community Halls | 71 | 23 | |
| Total | 263 | 127 | |

Based upon this information, approximately one third of all of the facilities contained in the inventory do not meet current community demand.

4.14 Community Centre Specific Data

Several specific questions pertaining solely to Community Centres were asked in the Survey. These findings are summarized below

Number of Facilities that include Partner Operated Spaces

In many cases, community centre facilities contain spaces that are operated by other organizations (i.e. for profit, not for profit or other governmental organization such as health services, physiotherapy or massage therapy). Of the 177 community centre facilities contained in the inventory, 74 contain space operated by a partner. In some cases, the nature of this partnership is contained in the inventory database.

4.15 Youth Centre Specific Data

Several specific questions pertaining to youth centres were asked in the Survey. These finding are summarized below.

Stand Alone Facilities

In many cases the Youth Centre facilities are attached to larger complexes such as community centres, aquatic centres and ice arena. In other cases, they stand alone as distinct facilities. Of the 69 Youth Centres contained in the inventory, 30 are stand alone and 39 are attached to other facilities.

4.16 Seniors Centre Specific Data

Several specific questions pertaining to Seniors Centres were asked in the Survey. These finding are summarized below.

Stand Alone Facilities

In many cases the Seniors Centre facilities are attached to larger complexes such as community centres, aquatic centres and ice arena. In other cases, they stand alone as distinct facilities. Of the 70 Seniors Centres contained in the inventory, 41 are stand alone and 29 are attached to other facilities.

Memberships

Survey participants were asked to identify whether or not they collect data regarding facility memberships. Of the 73 Seniors Centres contained in the inventory, 28 are collecting data on facility memberships. Survey participants were then asked to estimate the number of memberships within certain age categories. The results are contained in the following table.

Table 4.16

| Number of Members by Age Category | Total | |
|-----------------------------------|--------|--|
| Under the age of 69 | 11,512 | |
| Aged 70 to 79 | 15,181 | |
| Aged 80 plus | 6,946 | |
| Total | 33,639 | |

If we include the membership information that was not broken down by age category, the total number of members is 45,234.

Section 3: Facility Life Cycle Stages

Section 4: Key Findings

Section 5: Summary

Appendices

This study process has resulted in the compilation of a detailed and comprehensive database summarizing municipal recreation facilities in the Province of British Columbia. The information contained in the inventory provides the following key benefits:

- Basis for further analysis of recreation facility condition across the Province.
- Through future updates, the ability to track trends in facility construction and condition.
- Ability to study and compare major facility amenities.
- Ability to study regional disparities in the provision of municipal recreation facilities.
- Provides a framework for the comparison with other facility types, both indoor and outdoor.

5.1 Next Steps

As noted previously, the facility inventory is the third phase of a multi-phase project. This next stage will provide additional analysis on the data and in particular, provide comparisons between facilities surveyed in all three completed phases of the study.

In order to protect the relevance of the data, the BCRPA will develop a database maintenance strategy which will address issues such as additions, revisions, updates and access.

Survey

Following is a copy of the survey utilized in this study.

INTRODUCTION

The results of this study will be added to the previously collected data on pools, ice arenas, curling rinks as well as parks and open spaces. The database may be expanded in the future to include other indoor as well as outdoor facilities.

The survey is set up with the following five sections:

Part One General Questions

Part Two
Part Three
Part Four
Community Centre Questions
Youth Centre Questions
Seniors Centre Questions

Part Five Community Halls

Please make copies of the sections that apply to your facility and fill out a separate detailed questionnaire for **each** facility that your organization owns or operates.

We appreciate the time and effort involved in providing this information and thank you in advance for your cooperation. We assure you that the resulting database will provide our provincial recreation sector with considerable benefits, not the least of which would be a powerful case for public investment in infrastructure renewal.

Completed questionnaires should be faxed to 604-732-6695 Attn: Nancy Burton by November 10th 2005.

A Time for Renewal

Just as healthy living and environmental consideration require a new focus and on-going commitment, recreation infrastructure urgently needs on-going investment. With sustainable maintenance and funding for renewal, recreation facilities are one of the most cost-effective prescriptions for good health and engaged citizens.
